

MUTransport – Version 1.0 for Zikula 1.2.0 or later

Manual

Installing

like other modules

At this time supported Modules

- Pages (2.3, 2.4) as startmodule
- Content (3.0.3, 3.1.0) as start- and targetmodule

Features

With MUTransport it's possible, to transport pages from the modul „PAGES“ to the modul „CONTENT“ !
And it's possible to copy Pages in „CONTENT“ !

View of Modules

The View of Modules displays the supported modules and their state. MUTransport actualizes the display automatically ! The Modules must be active so that MUTransport works fine !

View of Pages

You can manage the pages of „PAGES“ and „CONTENT“ !

With the + Buttons you are able to add new Pages of Modules „PAGES“ and „CONTENT“ to the View of Pages.

And you are able to update the Information of Pages, if you should edit Pages in „PAGES“ or „CONTENT“, that are still in MUTransport !

With the – Symbol you can but mustn't delete Pages, you have deleted in the Modules „PAGES“ or „CONTENT“ !

The view of Pages is counting only content that is text and is calculating the number of characters.
For Pages of PAGES MUTransport is counting the number of transports, for CONTENT the number of Copies.

Function of Transport

To transport Pages from „PAGES“ to „CONTENT“ you only have to select the Pages you want to transport and press the transport button !

To copy Pages of „CONTENT“, you have to select the Pages, select the number of Copies and press the transport button !

Attention !

After copying Pages in „CONTENT“ ! If you edit the title of an new (just copied Page) in „CONTENT“, don't forget to edit the Permalink Url ! Otherwise you will get an Error, while copying the Page original.

CONTENT generates during the copying automatically a permalink url. That means, without working at the new Pages in CONTENT, you only can copy the last created Page ! Otherwise you will get a fault !

Many fun and more time with MUTransport
